SKILLS

PERSONAL SKILLS

CHRISTIAN K ANENE

VFX DESIGNER

SUMMARY

I am a dedicated and innovative graduate in Animation with VFX and Motion Design, passionate about crafting visually compelling content that combines artistry with technology. Proficient in 3D animation, visual effects, and motion graphics, I have experience using industry-leading software such as Maya, Blender, After Effects, Premiere Pro, and Cinema 4D.

EXPERIENCE

Accommodation Assistant Supervisor May 2019 - Present
KILLARNEY PLAZA HOTEL

- Coordinate and optimize daily task assignment and schedules, ensuring efficient workflow and timely completion of responsibilities.
- Conduct detailed inspections of rooms and facilities, ensuring strict compliance with hotel policies and exceeding guest expectations.

Media Design Management (Work-Placement) Jan 2023 - Jun 2023
ATTAIN.IE SERVICES

- Assisted in the creation and editing of visual content for digital and print platforms, ensuring brand consistency.
- Collaborated with the design team to develop engaging multimedia assets for marketing campaigns.
- Managed Project timeline and schedules to ensure timely delivery of media design projects.
- Conducted quality checks on media assets to maintain high production standards.
- Provided administrative support to the media team, including organizing files and updating design workflow.

IT/System Support and Media Management Oct 2015 - Jun 2018
TRAVELNOW24/7 LTD

- Provided technical support to ensure smooth operation of company system and resolved software and hardware issues promptly.
- Managed and maintained company websites and digital platforms, ensuring consistent functionality and accessibility.
- Designed and implemented multimedia content for marketing campaigns, aligning with company branding and target audience.
- Monitored and updated IT infrastructure, including network system and data backups, to enhance operational efficiency.
- Collaborated with cross-functional teams to troubleshoot technical challenges and optimize digital tools for improved workflow.

Munster Technological University Tralee Ireland
(Second Class Honours Grade 1)

Network Engineering Sep 2012 - Sep 2015
National Institute of Infromation Technology (NIIT)
(Diploma)

PROJECTS

3D Automated Smart House Feb 2024 - May 2024
My Final Year Project (Design by me)
The 3D Automated Smart House Project was my final-year academic project that showcased a futuristic, fully automated home of the 21st century. Using Maya, I created a detailed 3D visualization of a smart house equipped with advanced technologies for automation and convenience.

The project involved extensive research into smart home systems and their integration into modern living spaces. I designed and animated features such as automated lighting, temperature control, and voice-activated systems, all aimed at illustrating a seamless blend of technology and functionality.

This project not only demonstrated my technical skills in 3D modeling and animation but also highlighted my ability to conceptualize and execute innovative ideas, merging creativity with real-world applications.
